

## Watershed Technical Evaluations

Technical Evaluations for  
Sediment-Related TMDL Development in the Gualala River, Garcia River,  
Van Duzen River, North Fork and Upper Eel River, and South Fork Trinity  
River Watersheds

Reviewed and compiled existing sediment  
and river network data (North Fork and Upper Eel Rivers). Conducted air  
photo analysis of mass wasting features for multiple photo years.  
Conducted statistically based field studies to map, classify, and  
quantify sediment sources, including mass wasting, bank erosion and  
gullying for the Gualala, Van Duzen, North Fork Eel, upper Eel, South  
Fork Trinity Rivers. Developed sediment source allocations and sediment  
source information for the Gualala, Garcia and Van Duzen Rivers.
